

Banking Message Update May 23, 2025

1) Denise is preparing an ongoing report for the bank, so if you still have onboarding issues or any issues, in a sentence explain your issue. Include your email, phone and ONLY the last four digits of your GFG account. All these are going into a report that is getting forwarded to a bank contact. Note what dates you tried to resolve the issue previously. Just say what you need, pin reset, blocked, etc.

2) Please be sure you have downloaded the mobile app. I attached a How To and you'll need that app as a back up, plus that is the way you will access your prepaid credit because it will be on your phone through a QR code going live at some point.

3) When the prepaid credit is available (no announced date) more information will be available how to shop/use QR code/access funds/exchange gold etc. I don't have any of that right now but when I do, and any other video I am allowed to share, I will put it in the group text and on the agendas. Come to the meetings with your questions. When the system goes live, the QR code will be available, but not activated. It will be activated soon

4) Please everyone, **do not text me that you have bank issues.** Email if you can't get into your account, that's all-describe issue. I'm actually helping a few states right now. I have worked 60 hours a week volunteering for the assembly and that is increasing now. Denise.mraz@tccnva.org

5) Do Not Call Anna with your banking problems! She cannot help you.

6) I have received communication coordinators have threatened assembly members with propaganda about *do or don't join this or that assembly*, and also messages with the flavor of, *cutting off your money*, **save that email/text**. Even if it's a note of your recollection or a video or audio clip, they called you and said this, email it to

Banking Message Update May 23, 2025

outreach@theclarkcountyassemblygov.land. Send it to me with the date and time. Any communication from any coordinator or assembly learned person spreading these lies are doing it to control you through fear. **No coordinator or assembly official can remove you from the bank, ever.** And vica versa, if anyone has told you cannot be in the assembly, including coordinators that deny access through out of state federation recording and other methods , they have committed a crime. We are writing up criminal incident reports on all and every ignoramus doing any of this. This is never tolerated. The people who have already made these claims, or think they have the power to do this, will be dealt with by the Federation. Undermining an ASN with malfeasance or by malintent, is a criminal offense in American Common Law.

There is one Nevada Assembly and one Clark County Assembly.
